I dont know where to start from in march bring kicked out of the hospital when my father is on a respirator, and fighting the doc's to let my mother stay to make discions for my father while he was under heavy sedation, and could decide for him self.. with a doctor compared our hrs to his works day. And telling me if he get covid19 he wont help he would be in quarantine.. made me stand and be proud to represent those not being heard. I dont agree with making a sub community of mask and non masks. I believe in science mask are for those sick. Or in caution not for healthy people unless that their choice. I say alot online yet I'm ignored. I could tell you more but I feel time in limited in the idea I have to write it in ten mins. I'm for opening our businesses, so we can have jobs. As a buses I dont expect to be at work till next year.. so I work on my computer stuff.. all illegal in the eye of the government because I dont own a business.. I'm a local from cv. We cant even try right now. Im against ur 25 fee to cover people for covid19 " ur made problem" we need help not loan or more taxes. I have tried to get my point across it up to government to work with its community. Its unacceptable right now. Criminals are law abiding citizens.
