SPRINKLER TO DRIP IRRIGATION

Requirements:

- Must convert from a high-pressure, impact-type, sprinkler irrigation system (50 psi operating pressure or more at the sprinkler head) to a micro-irrigation system. Include an Assessor’s Parcel Map or other documentation to verify acreage.
- Applicable to sprinkler irrigated farmland that relies on electric pumping to water crops.

Exclusions:

- Drip tape systems are not eligible.
- Not applicable to new plantings of vineyards or orchards unless a vineyard or orchard was the previous crop on the field.

Sprinkler to Drip Irrigation Table

Product Code	Description	Rebate/Unit
401063	Sprinkler to Drip Irrigation	\$44.00/acre

LOW PRESSURE SPRINKLER NOZZLES

Requirements:

- Must convert from a high-pressure, sprinkler system nozzle (50 psi operating pressure or more at the sprinkler head).
- Must be accompanied by a pumping plant analysis to ensure reasonable pumping efficiency (45% Overall Pumping Efficiency or above) after the conversion.
- Portable hand-move or solid set systems may apply.
- Applicable to sprinkler irrigated farmland that relies on electric pumping to water crops.

Low Pressure Sprinkler Nozzles Table

Product Code	Description	Rebate/Unit
401064	Low Pressure Sprinkler Nozzles	\$1.15/nozzle
