CFDs 98-1 and 98-2 were created as interim districts because the areas of Otay Ranch included in these districts were not developed and the density of development was not yet known at the time that these districts were established. These districts were formed to provide a guarantee for financing of a portion of the cost of maintenance of portions of the parkways and medians along Telegraph Canyon Road, Paseo Ranchero, and Olympic Parkway. They also include the Telegraph and Poggi Canyon detention basins and channels allocable to the properties within these districts. Both CFD 98-1 and CFD 98-2 will remain in place until a permanent financing plan is established for the maintenance of the facilities, through the formation of new CFDs.

A portion of CFD 98-1 has been absorbed by CFD 99-2 with other portions absorbed by CFDs 08-M, 12-M, and 13-M. The Fiscal Year 2016/2017 budget for this district totals \$14,091; therefore no special taxes will be levied within this district in Fiscal Year 2016/2017.

A portion of CFD 98-2 has been taken over by maintenance district CFD 08-M with other portions of the district covered through CFD 12-M. None of the improvements in CFD 98-2 are expected to be turned over to the City in Fiscal Year 2016/2017 and therefore no special taxes will be levied within this district in Fiscal Year 2016/2017.
