Only then will the City be able to proceed in the realization of its stated goal to support healthy community, strong and secure neighborhoods and a connected community...

20. What are your principal areas of interest in our City government, and what experience or special knowledge can you bring to those areas?

Involvement from citizens in city government is the cornerstone of Democracy. The community's voice should always be voiced in the decisions made for them. Boards such as this allow residents to provide a different point of view from the many diverse corners of the city. The more diverse voices exist the better the city and its institutions can serve the community.

I bring bring several perspectives to the table. As a person who has lived in the community for the past five years and married to a lifelong member of the community, I provide a resident perspective for the role a library plays in its community.

In addition, as a parent to two young boys, I recognize the value for a public library provides the communities such as access to reading materials for all ages and allows children to develop literacy skills no matter what income level.

Also, as a person who has been involved in the library system since the age of 16, first at the National City Public Library then Geisel Library on the UC San Diego Campus, I understand the role and need a library plays for the community is serves.

Lastly, I provide a point of view from an educator's perspective. As a Social Science teacher that lives and teaches in the community whose teaching revolves on literacy skills, I regard literacy and the access to literature as one of the fundamental needs for a community.

21. What would you hope to accomplish in the role of a Member of the Board of Library Trustees? (250 words or less)

As a Member of the Board of Library Trustees I hope to collaborate with the rest of the board members to come up with ideas and strategies to empower the community using the library as a tool. Literacy is an extremely powerful tool that empowers a community of any age, any race, any income level etc. I would also like to demonstrate to the community that libraries are more than "just books" but are a necessity to empower citizens in a variety of ways that go beyond literacy.

22. I understand that to be considered, I must submit a resume along with this application.

20. What are your principal areas of interest in our City government, and what experience or special knowledge can you bring to those areas?

My principal areas of interest in our City government include Smart Growth, Active Transportation, Urban Planning, and socially and economically equitable resource conservation. I hope that my academic experience at UC San Diego's Urban Studies and Planning Program and my professional experience at City Heights Community Development Corporation, a place-based non-profit that strives to improve the quality of life of City Heights residents, will be of value to this Commission. Additionally, I have experience with resource conservation from my position as student worker at the County of San Diego Department of Parks and Recreation Resource Management Division. At this position, I worked closely with environmental planners on projects related to the management of preserved County land. I worked directly on right of entry permits to parties including researchers and community groups, acquisition inventory, and trail alignment studies on the field. My knowledge of the CEQA process, the Multiple Species Conservation Program, and this region's resource management, could be helpful to this Commission.

21. What would you hope to accomplish in the role of a Resource Conservation Commissioner? (250 words or less)

I hope to contribute to Chula Vista's direction towards a more sustainable and equitable future. I would like to prioritize the role of active transportation, Environmental Justice, and the social equity framework, within sustainable development. I am

eager to apply my urban planning background and experience with resident advocacy to Chula Vista planning, through my role as Resource Conservation Commissioner. Chula Vista has beautiful natural resources and a diverse population with varying needs. It is imperative to strike the right balance between meeting our needs and preserving our amazing natural resources for current and future generations.
