REJECTION OF BID FOR OP212, CITY PARKING LOT REHABILITATION

Mrs. Alicia Vasquez,

As you know, we opened the bids for OP212, "City Parking Lot Rehabilitation", on February 19, 2014. At the bid opening, we announced that Frank & Son Paving, Inc. was the apparent low bidder at \$164,245.10.

City staff subsequently reviewed your bid for compliance with the contract documents. Unfortunately, a review of the license requirements for this project has led us to conclude that your bid is non-responsive. As indicated in Section 5 of the Proposal Requirements and Conditions, the minimum combination of license for this contract are a Class A: General Engineering Contractor license or a combination of C-8, C-10, C-12, C-31, C-32 and D-49 contractor licenses. Your proposal indicates that your firm only has a C-12 (Earthwork and Paving) license, and your subcontractor, Statewide Stripes, Inc., has only a C-32 (Parking and Highway Improvement) license.

Additionally, on March 3 the California Contractors' License Board website indicated that your license has been suspended for failure to comply with the Workers' Compensation requirements. Although you may be able to rectify this situation, it would not take care of our other licensing requirements.

Therefore, we regret informing you that we are recommending that your bid for OP-212, "City Parking Lot Rehabilitation", be rejected for being non-responsive. If you have any questions about this, please contact Elizabeth Chopp, Senior Civil Engineer, at (619) 691-5046.

Sincerely,

FRANCISCO X. RIVERA, T.E., P.E.
PRINCIPAL CIVIL ENGINEER
